

COLOCATION AT COREXCHANGE CONNECTION

CoreXchange's data center in the central Dallas market district at 8600 Harry Hines Boulevard allows customers to colocate their servers and applications with the same level of Tier-1 Internet backbone access, carrier access, performance and customer support as in the Dallas Infomart facility. The CoreXchange Connection facility meets stringent data center standards with a completed SAS70 Type II audit, and offers enterprise-class specifications in space, redundancy, connectivity, cooling, and security. The CoreXchange Connection is conveniently located within eight miles of downtown Dallas and only two miles from Dallas Love Field Airport. Customers can access the entire suite of CoreXchange's network-layer managed services, delivered to standard cabinets and cages, along with custom cages and suites.

Space

- SAS70 Type II audited facility
- Expandable in 10,000 sq. ft. data center pods
- Same day provisioning available
- Half cabinet, full cabinet and customized cage solutions
- 24/7/365 physical access
- Covered dock with three bays
