

## CoreAvailability<sup>SM</sup> Disaster Recovery & Business Continuity Services

Are your business and IT operations prepared in the event of a disaster? Along with off-site backups of your data and applications, do you have a secondary data center to rebuild and operate your servers? In addition to your IT infrastructure, how would your employees recover quickly from a catastrophic weather disaster, fire, flood or common power failure? Having an emergency response plan in place with office space, phones, workstations and Internet access will enable your personnel to recover quickly from a prolonged disruption.

As an innovator in advanced IT infrastructure services, CoreXchange has developed its CoreAvailability service to meet your disaster recovery and business continuity needs. CoreAvailability is an affordable way for your business to implement a disaster recovery plan.

**“Disaster Recovery is not just an IT problem and area of responsibility, Disaster Recovery capabilities fit squarely into the evaluation of risk that a business faces.”**

- Forrester Research

**“Two out of five companies that experience a catastrophic event or prolonged outage never resume business. One out of three firms that do manage to come back go out of business within two years.”**

- Gartner Research

CoreAvailability disaster recovery services combine our advanced networking services with our state-of-the-art Business Continuity Center. With access to data center space, furnished office space, meshed network connectivity, and logistical support, CoreAvailability is the most comprehensive disaster recovery solution on the market.

## Business Continuity Center Snapshot
