

CoreXchange ConfiguratorSM

The patent-pending CoreXchange Configurator is the network services industry's first tool that allows enterprise users and resellers to control the performance and cost of their Internet connection. Users can instantly configure and generate pricing for a multi-homed mesh of Tier-1 backbone carriers at <http://configurator.coreexchange.com>.

The Configurator provides the ability to configure customized network services:

- **Selection**— Multiple Tier-1 Internet backbones through one single source
- **Customization**—Select carriers, connection, commitment, cap level, and contract length
- **Instant Pricing**—Immediate bandwidth pricing online, an industry first
- **Immediate Installation**—Custom configurations live and available today

CoreXchange connectivity services are available within the CoreXchange data center located within the Dallas Infomart carrier center or at a customer's site via metro Ethernet.
