SAS 70 CERTIFICATION, EQUINIX, TERREMARK & MORE

COREXCHANGE EARNS SAS 70 TYPE II CERTIFICATION

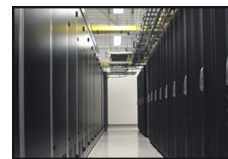

CoreXchange recently completed a successful SAS 70 Type II certification. The SAS 70 multi-step review of all critical operational activities includes controls over information technology and related processes and proves the effectiveness of CoreXchange controls and processes that protect our customers' IT infrastructure and data. EXPANDING THE NETWORK THROUGH THE EQUINIX IBX

CoreXchange expanded its network presence through the Dallas Equinix International Business Exchange, creating one of the strongest, most reliable high-performance internet infrastructures available. The Equinix IBX gives CoreXchange customers with high availability demands such as VoIP, gaming, video on demand (VOD), multi-media streaming, e-commerce and other high-performance applications the immediate benefit of:

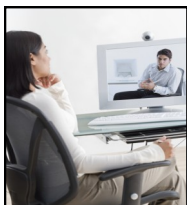

- Direct access to Equinix carriers with multiplexing capabilities
- Increased interconnectivity with scalability
- Peering arrangements with Equinix participants
- Capacity up to OC-192 direct access

MONITORING SERVICES START AT \$10/MONTH

CoreXchange offers a variety of monitoring options that will not only warn you when servers are down, but proactively tell you in advance when systems are at a critical level. We provide solutions that replace or expand on your current monitoring systems and help eliminate downtime due to hardware, software, system or process failures. Our onsite NOC technicians are here to respond to alerts 24/7/365 and provide escalations as defined by you in advance.

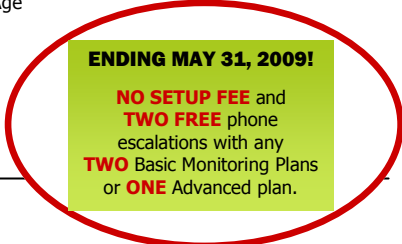

BASIC MONITORING Includes your choice of 10 of the following: PING, HTTP, FTP, SMTP, POP, IMAP, LDAP, MYSQL, NNTP, NTP, ORACLE, PGSQL (Postgres SQL), SNMP
\$10/month per host name

ADVANCED MONITORING Choose 10 from the Basic Monitoring Packages and 5 of the following: Custom TCP Port, HTTP Page String Checking, MySQL Query, Disk Usage, Memory Usage, Number of Users, Process Check, Mail Queues, System Load, Hard Drive SMART Information, File Age
\$20/month per host name

EMAIL ESCALATION Free with any monitoring package

PHONE ESCALATION \$5/month per phone number

SERVER REBOOT ESCALATION Free with any monitoring package

TERREMARK ESTABLISHES NETWORK POP

Terremark Worldwide, Inc. (NASDAQ:TMRK), a leading global provider of IT infrastructure services, is establishing a network Point of Presence (PoP) at CoreXchange. Key in Terremark's selection is the ability of CoreXchange to provide access to the world's leading Tier-1 backbone networks through a single network connection.

With data centers in the United States, Europe and Latin America, Terremark provides government and enterprise customers a comprehensive suite of managed solutions including managed hosting, colocation, disaster recovery, security and cloud computing services.
